

## Cyber Sense Bell work

1. **Cyberbullying:** Harassment, taunting, and teasing committed online, such as in chat rooms or by posting inappropriate or false information or images of someone.
2. **Firewall:** Internet security software and /or hardware that protects your computer against unauthorized access.
3. **Hacking:** Entering another user's computer without permission and undertaking activities such as stealing personal information or crashing the system; the digital equivalent of breaking and entering.
4. **Intellectual property:** Property of the mind including ideas, inventions, and creations such as art and music.
5. **PayPal:** Third party vendor online that allows users to securely send and receive online payments via bank accounts or credit card.
6. **Phishing:** Tricking users into revealing personal information such as passwords and bank account numbers by way of emails purporting to be from actual companies; users are directed to a bogus Web site and asked to input sensitive information, which can then be used in identity theft.
7. **Plagiarism:** Copying or using someone else's work and taking credit for it without acknowledging the real author. Plagiarism can occur online when students copy or by academic papers and turn them in as original work, or when they copy passages from online and paste it into their own work.

## Cyber Sense Bell work

8. **Trojan horse:** Computer program that appears to be a harmless or helpful application (such as a game) but actually causes damage to a computer once downloaded.

9. **Virtual (digital) footprint:** Information about yourself that you leave online through postings and photographs. Even if you delete something, it remains online in some capacity- don't forget that every action you take online is permanent.

10. **Virus:** Malicious software that enters a computer and negatively affects that computer's ability to run correctly.

11. **Data mining:** using someone's internet activity to gather and store information on him or her.

12. **Privacy Settings:** tools to limit access to your personal information and photos online.

13. **Social Networking:** Connecting with friends, peers, and new acquaintances via various internet sites (such as Facebook and Twitter).
